

Instructions for the EXTREME Adhesive Cartridge Adapter

The 50ml EXTREME® Adhesive cartridge adapter fits all standard caulking guns.

To use, insert the EXTREME Adhesive® cartridge into the adapter as shown

Slip the retainer on the blue cartridge plunger over the caulking gun follower plate

Place the filled adapter in the caulking gun barrel, aligning the plunger with the cartridge

Advance the plunger forward until light contact is made with the cartridge pistons. Remove the tip cap from the cartridge and attach a mixer.

The adhesive is ready to use.

Tips:

- * *As with caulk, relieve the pressure on the cartridge after use to minimize drool*
- * *Mark the tip cap with a Sharpie before removal so it may be replaced in the correct position to reseal the cartridge*
